

Senior DevOps Engineer

About the candidate

Highly skilled Senior DevOps Engineer with over five years of experience optimizing and automating large-scale infrastructure.

Has a strong track record of implementing CI/CD pipelines, deploying and managing AWS-based scalable applications, and enhancing infrastructure monitoring using tools like Grafana and Prometheus. Also, he has extensive expertise in Kubernetes administration, working with Amazon EKS, and leveraging Terraform for infrastructure as code. Additionally, he has been actively involved in on-call rotations, ensuring system reliability and minimizing downtime.

His ability to collaborate with cross-functional teams, streamline software delivery processes, and manage multiple projects simultaneously makes him a strong fit for a senior-level DevOps role in a high-performing engineering environment.

Experience

Eureka Labs (Argentina) | August 2025 - December 2025

As a **DevOps Engineer**:

- Diagnosed and resolved complex system issues, performing root cause analysis and optimizing operations.
- Managed and maintained runtime environments, cloud infrastructure, and Kubernetes clusters, ensuring stability, scalability, and security.
- Developed Python scripts and CI/CD pipelines with GitHub Actions to support automation and deployments.
- Implemented monitoring and alerting with Grafana, Prometheus, and Kibana, maintaining system observability.
- Automated infrastructure and workflows using AWS, Terraform, and Docker, optimizing performance and cost.
- Collaborated with cross-functional teams in English, translating business requirements into scalable technical solutions.

Qualabs (USA) | October 2021 - May 2024

As a **DevOps Engineer**:

- Designed and implemented CI/CD pipelines, accelerating software delivery and minimizing manual intervention.
- Compiled and packaged source code into distributable formats, ensuring consistency and quality.
- Utilized AWS to deliver scalable and cost-effective infrastructure solutions.

- Managed multiple projects simultaneously, ensuring timely delivery and adherence to best practices.
- Collaborated with development teams to implement DevOps best practices and streamline workflows.
- Maintained and monitored production environments, ensuring high availability and optimal performance.

Education

Universidad Nacional de Rosario (Argentina)

Bachelor Degree in Science Computer Engineering

Skills Proficiency

Cloud Platforms: AWS, Azure, OCI, Digital Ocean | **Infrastructure as Code:** Terraform, CDK, Terragrunt | **CI/CD Tools:** GitHub Actions, Bitbucket Pipelines, GitLab | **Containers & Orchestration:** Docker, Kubernetes Administration, Helm, ArgoCD | **Scripting:** Bash, Python | **Monitoring & Logging:** Grafana, Prometheus, CloudWatch | **Database Management** | **Operating Systems:** Linux and Windows Server | **Incident Management:** On-call rotations with PagerDuty.

Language

Spanish: Native or Bilingual Proficiency

English: Full Professional Proficiency
